

Mathematics 2

Do you want to study Mathematics?

Do you enjoy problem-solving?

In this course students cover mathematical topics of Arithmetic and Geometric Sequence and Series, Geometry and Vectors in the Plane.

Each area of the course consists of a number or subtopics that students apply real-world knowledge and incorporate technology.

SACE Credits

10 credits

Assessment

Skills and application tasks
Mathematical investigations

Subject Length

1 semester

Prerequisites

N/A

Additional Information

This subject can be used as one of the compulsory numeracy requirements of the SACE. A graphics calculator is required for stage 1 Mathematics 1-4 and can be purchased or borrowed through the school (subject to availability).

Mathematics 4

Do you want to study Mathematics?

Do you enjoy problem-solving?

Students explore a range of mathematical topics relating to Further Trigonometry, matrices and real and Complex numbers.

Each area of the course consists of a number or subtopics that students apply real-world knowledge and incorporate technology.
