

ACEE

Automotive, Construction, Electrotechnology, Engineering

Curriculum on Offer	
ACEE Year 1 (year 11)	
1	Essential Mathematics Semester 1 Engineering Integrated Learning Semester 2
2	Activating Identities and Futures
3	Entrepreneurship Integrated Learning Semester 1 Rec PE Semester 2
4	Essential English
5	MIND
6	Advancing Technologies (Material Solutions strand of Design, Technology and Engineering)
7	VET stream: <ul style="list-style-type: none"> - Automotive - Construction - Electrotechnology - Engineering (welder/fitter) - Resources and Infrastructure
ACEE Year 2 (year 12) (Non ATAR)	
1	Recreation Physical Education (Fit for work)
2	Advancing Technologies (Material Solutions)
3	Business Innovation (Community connections)
4	MIND
5	Study
6	Study
7	VET stream (if not completed in year 11): <ul style="list-style-type: none"> - Automotive - Construction - Electrotechnology (welder/fitter) - Resources and Infrastructure

ACEE

Automotive, Construction, Electrotechnology, Engineering

Description:

ACEE is a specialist Industry Pathways Program (IPP) for students interested in one of the following careers:

- Automotive: Light Vehicle and Diesel
- Construction: Building, Carpentry, Cabinet Making and Bricklaying
- Electrotechnology: Electrician
- Engineering: Boiler Maker, Fitter & Turner and Metal Fabrication

The program is designed to provide students with the skills, experience and capabilities to increase employment/School-Based Apprenticeship opportunities. Students will engage in community projects and work placements.

Entry requirements:

- Pass grade in year 10 EIF (Exploring Identities and Futures), English and Maths
- C grade average in subjects
- 80% attendance
- Positive behaviour for learning within school
- Successful participation in the VETRO practice assessment
- Evidence of Industry Immersion exploring the identified pathway
- Passing VETRO to required exit score
- Signing of the code of conduct
- Completion of enrolment forms

SACE/ATAR attainment:

Estimated 50 credits at SACE Stage 1.

This course cannot be used to gain an ATAR.

Anticipated duration: 12 months.
