

# Future Technologies – Design and Textiles

---

*Do you want to learn about design?*

*Do you want to know how to sew?*

Design and Textiles may be the first time that learners have an opportunity to use basic sewing tools and technology. Taking the time to discover what knowledge and experiences learners have coming into the course, will help plan for instruction.

One common misconception learners may hold is a gender stereotype surrounding sewing. It is important to dispel any misconceptions and show learners that sewing, fashion and clothing choice, is for all genders. Sewing skill development is a life skill which can be used for repairs, construction and career development. Learners should be provided opportunities to use a variety of methods for creating projects such as hand sewing, machine sewing, equipment identification and measurement.
