

# Science

---

*Do you want to learn about Biology at stage 1?*

*Do you want to expand your knowledge on the laws of motion?*

Students will apply their knowledge of specialised equipment to design laboratory experiments.

Students will continue to write formal reports on these experiments, and will be expected to comment on their findings in detail. Students will study physics, biology and chemistry topics that have strong links to stage 1 science subjects. Classroom learning, assignments and projects will include units on the laws of motion, the structure of the periodic table, natural selection and the universe. Students will also investigate how scientific theories have developed and reflect on the discoveries that caused them to change over time.

## **Assessment**

Designing experiments

Scientific reports

Research projects

## **Subject Length**

Full year

## **Additional Information**

N/A
