Introduction

Thinking about life after secondary school may feel overwhelming. There is very helpful support available at school to help choose a career pathway. The focus of this support is to help students identify their strengths, what they enjoy doing, in support of success both at Whyalla Secondary College (WSC) and post school. Strategies include and are not limited to; Personal Learning Plan (PLP), Career Education, attending Career and Subject expos, work placement and the WSC Subject Recommendations for Career Pathways. Resources like the WSC Subject Recommendations for Career Pathways resource can provide students a guide to the type of subjects that can be done in year 11 and 12 to support their identified pathway.

Post school pathways could include:

- Starting an apprenticeship
- Continuing with further study
- Finding work, starting a business or
- Even taking a gap year.

There are so many options that it may feel difficult to identify a career pathway, but remember people can move between pathways and are not restricted to one occupation or education level. Many people return to study to upgrade their qualifications during their adult lives.

The three main post school pathways as identified through the past destination data are University, Vocational Education and Training, and Employment.

University

When considering University as your post-secondary schooling pathway it is important to explore the specific course requirements (known as Stage 2 prerequisite subjects) set by each University.

Please remember that recognized VET studies at Certificate III level can contribute to your ATAR score.

Alternative pathways to university may include

- Transferring from recognized VET certificates
- Undertaking foundation studies programs specific to your preferred career pathway, that build skills and prepare students for university courses.

For further information in relation to University entry requirements please visit SATAC website following the link <https://www.satac.edu.au>

Vocational Education and Training (VET) enables students to acquire skills and knowledge for work through a nationally recognised industry-developed training package or accredited course.

Undertaking VET may benefit students' exploration of a variety of career pathways; it is not just reserved for a pathway within the trades (e.g. plumbing, automotive, and construction). Students can complete VET qualifications in a diverse range of industries.

Apprenticeships and Traineeships combine training and employment. Work is balanced between on-the-job work/ learning and undertaking a nationally recognised vocational training qualification as a paid employee.

Employment

A paid job brings an income, freedom and a chance to learn new skills and do new things. Getting a first job is not always easy and people often have to apply for a number of jobs before they are successful.

- Remember approximately 80 percent of jobs are never formally advertised. It is important to 'access your allies' and use any networks (family and friends) you may have.
- Get someone else to check your job applications and resumes
- Practice interview techniques
- You may not succeed initially, but try to remain positive.

The Key:

RED indicates the subject is compulsory

GREEN indicates that any subject will satisfy the identified pathway

P Prerequisites (Stage 2) subject identified in the SATAC guide, please refer to the source for the most current requirements.

AK Assumed knowledge (Stage 2 unless stated) subject identified in the SATAC guide, please refer to the source for the most current requirements.

NA Not Applicable

WSC Subject Recommendations for Career Pathways resource has been developed by WSC with consideration and information regarding the subjects offered or accessible from WSC, information from the SATAC Guide, Career Profiles from: My Futures web site, VET subjects offered or accessible from WSC and the courses offered through the three South Australian Universities: University of SA, Adelaide University and Flinders University. WSC Subject Recommendations for Career Pathways resource is only a guide and is not liable for any recommendations, as they are only suggestions most appropriate at time of guide development.

Accountant

Accountants analyse, report on and give advice about the financial dealings of organisations and individuals and advise on associated record-keeping and compliance requirements.

YEAR 11 SUBJECT RECOMMENDATIONS - SEMESTER 1

- Business Innovation
- Career Exploration
- Free Choice Subject
- Mathematics (M1, M3) or General Mathematics
- Essential English
