Information, Media and Technology

Are you interested in a career
in game design or coding? Do
you want a career in graphic
design?

About IPPs

Industry Pathways Programs (IPP) offer tailored educational opportunities for students who have identified specific interests and career goals. Developed in collaboration with industry partners, tertiary education providers, and the broader community, these specialist programs provide students with real-world learning experiences in their chosen fields through project-based learning. Each program is contextualised and designed to support SACE completion and can contribute towards an ATAR, ensuring students remain eligible for university entry while pursuing their individual passions.

If you are in Year 10 and are interested in an IPP please see the Pathways team for more information

**See Application Timeline
for application process**

(Application form in information pack)
